Honorable Commissioner for Patents
Washington, D.C. 20231

Docket No: S85.2-9608

PRELIMINARY AMENDMENT

Prior to examining this application, please amend the above-identified application as follows:

In the Claims:

Please amend claim 1 as follows:

1.(Once Amended) A tool for directing bone replacement material into a defined space comprising:

- a) an elongated hollow tube having a proximal and a distal end, said proximal end being adapted for attachment to a source of bone replacement material under pressure; and
- b) said distal end including at least one deflector opening for deflecting bone replacement material out of said tube at an angle relative to a longitudinal axis of said tube, each said at least one deflector opening having a length of between about 1 ½ to 3 D, wherein D is the internal diameter of said tube.
